### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Particularly, in claim 3, bridging lines 8 and 9, recitation of “and the second engaging portion defined by the slit” renders the claim(s) indefinite since it is not understood which “slit” is in reference to, (i.e., the slit of the first engaging portion, or the slit of the upper wall of the female member). Similarly, in claim 5, line 3, the subject matter pertaining to the phrase “the slit” renders the claim indefinite since the “the slit” is not identified between the two slits established in the claims.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lerra (U. S. Patent Publication No. 2002/0083562 A1). Lerra ('562) discloses a buckle (se Figs. 1 through 1D) comprising: a female member (14) having a first attaching portion to be attached to one member, and a first engaging portion (portion of female member including and between portions 20 and 21), and a male member (12) having a second attaching portion to be attached to another member, and a second engaging portion (portion including prongs 16) for engaging the first engaging portion so that the male member is connected to the female member, said second

Art Unit: 3677

engaging portion being released from the first engaging portion when one of the male member and the female member is pulled away from the other of the male member and the female member with a force greater than a predetermined level, one of a portion (resilient portion 20) with the first engaging portion and a portion with the second engaging portion being formed of resin ("TPEs", see col. 2, paragraph [0033], line 2) with hardness (see col. 2, paragraphs [0032] and [0034]) lower than that of the other of the portions; and (concerning claim 7) the resin is a thermoplastic elastomer (see col. 2, paragraph [0033], line 2).

***Allowable Subject Matter***

Claims 3-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
